

Educational Support Network

Does your educational system need outside expertise, new ideas, and support in order to take the next step?

Partner with Learning Curve Educational Consulting, Inc. (LCEC). LCEC, Inc. has an experienced team with documented successes in program evaluation, awareness, planning and progress. LCEC staff can help to frame school improvement plans, develop local leadership, deliver research-based professional development, and assist with the effective use of data. Inquiries are welcome and references are available.

What is an Educational Support Network (ESN)?

A customized, structured network where all educators (administrators and teachers) learn to identify what works and how to support, implement, and monitor successful programs. Specifically, ESNs:

- Engage in processes to evaluate current programs and school/school district goals progress.
- Build local leadership and capacity to improve academic programs and support local initiatives.
- Utilize high quality resources to enable the implementation of improvement efforts across participant schools/school districts.
- Gain an external perspective to facilitate decision-making for school/program improvements.

Target Audiences:

- Regional partnerships or consortia
- Individual schools/school districts
- Administrators, Supervisors of Instruction, Academic Coaches, Lead Teachers, and Teachers

The Educational Support Network Program Content:

- Identifying and using quality data
- Professional development on the effective use of data use in Professional Learning Communities (PLCs) and strategies for going to scale
- Designing and administering high-quality formative and summative assessments
- Next Generation Standards and Assessments
- Creating and supporting the development of local leadership
- Research-based instructional strategies
- Changing or supporting change in school culture (i.e.: developing a school that promotes post-secondary education as a high school outcome)

Learning Curve Educational Consulting:

A Regional Vendor Bringing National Experience and Success to Your School District

Learning Curve Educational Consulting, Inc. (LCEC)

www.learningcurveec.com

LCEC provides high quality professional development and support for improvements in education that are responsive to the needs of educators at all levels. LCEC provides ongoing professional development that models research based practices for classroom teachers, instructional coaches, principals, districts and university instructors. It is through these multi-tiered partnerships at the local, state and national level that LCEC maintains an up-to-date focus which responds to the priorities of math and science education.

LCEC professional development and research-based strategies have positively impacted teaching and learning in 15 states.
